Abu Bakar

Senior Full-Stack Software Engineer

+92 304 3397881 | iabubakardev@gmail.com | LinkedIn | GitHub | Pakistan

Professional Summary

Senior Full-Stack Software Engineer with 5+ years of experience building and maintaining web, mobile, and desktop applications. Hands-on experience across frontend development, backend APIs, database design and integration, third-party services, and automated testing. Built products across fintech, Web3, gaming, retail, and enterprise software, including AI-powered application workflows. Experienced in working with distributed teams, integrating complex services, and delivering features across the software development lifecycle.

Technical Skills

Languages: TypeScript, JavaScript, Python, PHP, C#, SQL

Frontend: React, Next.js, Angular, HTML5, CSS3

Backend: Node.js, Express.js, FastAPI, Laravel, .NET, REST APIs, GraphQL, WebSockets, Webhooks

Mobile/Desktop: Ionic, Capacitor, Cordova, React Native, Electron

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Platforms and Integrations: Supabase, Firebase, Wallet Integrations, Blockchain APIs, Banking APIs, Stripe, Zoom, OCR

Testing: Playwright, Vitest, Storybook, Jasmine, Karma, Jest

AI: LLM-Powered Applications, AI-Based Compliance, Conversational AI, PyTorch

Infrastructure and Tools: Git, Nginx, API Integration, Debugging, Deployment, AI-Assisted Development Tools

Work Experience

HyperPlay Labs / CoinFello — Remote, USA

Senior Full-Stack Developer — *September 2025 – Present*

- Developed features across a Web3 gaming desktop platform and an AI-powered application for blockchain transactions and financial workflows.
- Implemented swap, bridge, and staking user flows, integrating wallet connectivity and blockchain services into the application.
- Contributed to application architecture and backend integrations supporting authentication, transaction workflows, and communication between frontend and service layers.
- Worked on Electron desktop application features, including controller navigation and spatial traversal across interactive interfaces.
- Created and maintained end-to-end tests with Playwright to validate critical application workflows and catch regressions.
- Built reusable frontend components, investigated production issues, and collaborated with distributed engineering and product teams.

ILI Digital AG — Remote, Germany

Senior Software Engineer — *June 2025 – November 2025*

- Developed and maintained a student-teacher mobile application, implementing application features and supporting data exchange with backend services.
- Contributed to Contac, an expense management and compliance platform, across Next.js frontend features and Python/FastAPI backend services.
- Integrated receipt OCR and banking APIs to support expense tracking, transaction processing, and automated compliance validation.
- Implemented backend API and data synchronization improvements to support reliable communication between application components and external services.

Salvay — Remote, USA

Software Engineer II — *July 2023 – May 2025*

- Developed and maintained mobile applications used across a retail network of more than 4,000 stores in Europe and North America.
- Optimized SQLite queries and offline data workflows to improve local data access, application responsiveness, and synchronization reliability.
- Worked on backend integrations, PHP-based services, and Python synchronization scripts to support data exchange and consistency between application and server systems.
- Supported application deployments and server-side troubleshooting, including Nginx configuration and performance optimization.
- Contributed to a blockchain-based gaming marketplace and developed interactive features for a Dungeons and Dragons technology-based website.

Syntron Solutions Islamabad, Pakistan
Software Engineer *May 2022 – June 2023*

- Developed an e-commerce administration portal and mobile application, implementing business workflows across frontend interfaces, backend services, and databases.
- Built a resume builder using Angular and Laravel, connecting user-facing document creation features with backend application logic.
- Integrated Zoom and Stripe APIs into mobile applications to support video conferencing and payment processing workflows.
- Implemented Firebase-based real-time functionality and worked on database operations and API integrations supporting application features.
- Participated in debugging, code reviews, and application testing to improve reliability and maintainability.

Nextstep Business Solutions Lahore, Pakistan
Software Engineer *October 2020 – June 2022*

- Developed and maintained hospital management ERP modules covering patient management, inventory, and pharmacy workflows.
- Implemented frontend functionality and integrated backend APIs to support data exchange and business logic across enterprise application modules.
- Optimized SQL queries and stored procedures to improve database operations and application responsiveness.
- Worked across application and database layers to troubleshoot issues and improve the usability and reliability of hospital management workflows.

Education

University of Agriculture Faisalabad, Pakistan
B.S. in Software Engineering, GPA: 3.21/4.00 *2016 – 2020*

- Final Year Project: Conversational AI Chatbot using PyTorch
